Other (please specify)  
Depends on the organisation - a lot wouldn't be relevant to me

**Q15: Are there any particular industry events you would like to see co-located with UKNOF in the future?**

Not really the free and short nature makes it a useful conference. Longer or paid for conferences are harder to justify without some significant gain in attending.

The wide range of presentations on different networking related topics and of course the opportunity to meet people.

**Q17: Please indicate what you see as the major weaknesses or areas for improvement for a UKNOF meeting.**

I'd like to see the more well known and connected people facilitate less well known and connected individuals particularly those not from ISP related companies.

No

**Q12: Are there any particular topics you would like to see covered in a UKNOF meeting?**

- More security stuff?
- Network Architecture
- M2M/IoT implications on networks (e.g. managed devices you can't set IP addresses on easily. Lots of low streams of data rather than some big, I don't know, monitoring of large amounts of low power end points?)
- Industrial applications of networks (how industry is/has adopted IP and the lessons that can be learnt from the people who have run networks for a long time)

**Q14: If we run a co-located meeting with other industry organisations, how long should the total combined events be?**

Other (please specify) N/A

**Q15: Are there any particular industry events you would like to see co-located with UKNOF in the future?**

I actually find it easier to justify time out the office if it's just a standalone single day. If I end up at a variety of events continuously for a week people might wonder why they pay me :)

### PAGE 4: General feedback

**Q16: Please indicate what you see as the greatest strengths of a UKNOF meeting.**

The community and networking opportunities from all sorts of organisations.

**Q17: Please indicate what you see as the major weaknesses or areas for improvement for a UKNOF meeting.**

The lack of visibility of the schedule in advance of the free tickets stopping is a slight annoyance, but I can appreciate why it is that way.

**Q18: Do you have any other comments? (This section may include feedback such as how UKNOF meetings may be improved, catering, facilities, etc).**

I actually find it quite distracting (and possibly disrespectful to the speakers) the number of people who come to UKNOF with a laptop and just check emails, sort out invoices and generally do work and pay no attention to the speakers.

1. Utter OPSEC fail from the people around me, I saw invoices for thousands of pounds, customer emails and all sorts.
2. If you just want to work, why not stay at work and join remotely on webcast?

My suggestion (although I'm sure incredibly controversial) would be to remove the tables and power and have more of a theatre layout (I think this happened at the back of the last UKNOF in Reading if I remember correctly?). Have tables and chairs outside the main talk room for the inevitable emergencies that need dealing with.

As always - great meeting, but I was unable to attend until the afternoon which appeared to mostly consist of sponsor presentations that weren't unfortunately that interesting or relevant. The IPBill discussion was perhaps not long enough and the panel wasn't diverse enough.

**Q18: Do you have any other comments? (This section may include feedback such as how UKNOF meetings may be improved, catering, facilities, etc).**

Whilst it is great to see zero cost and a growing number of attendees I think that only scales so far. A nominal fee may be inevitable in order to keep things sustainable.
